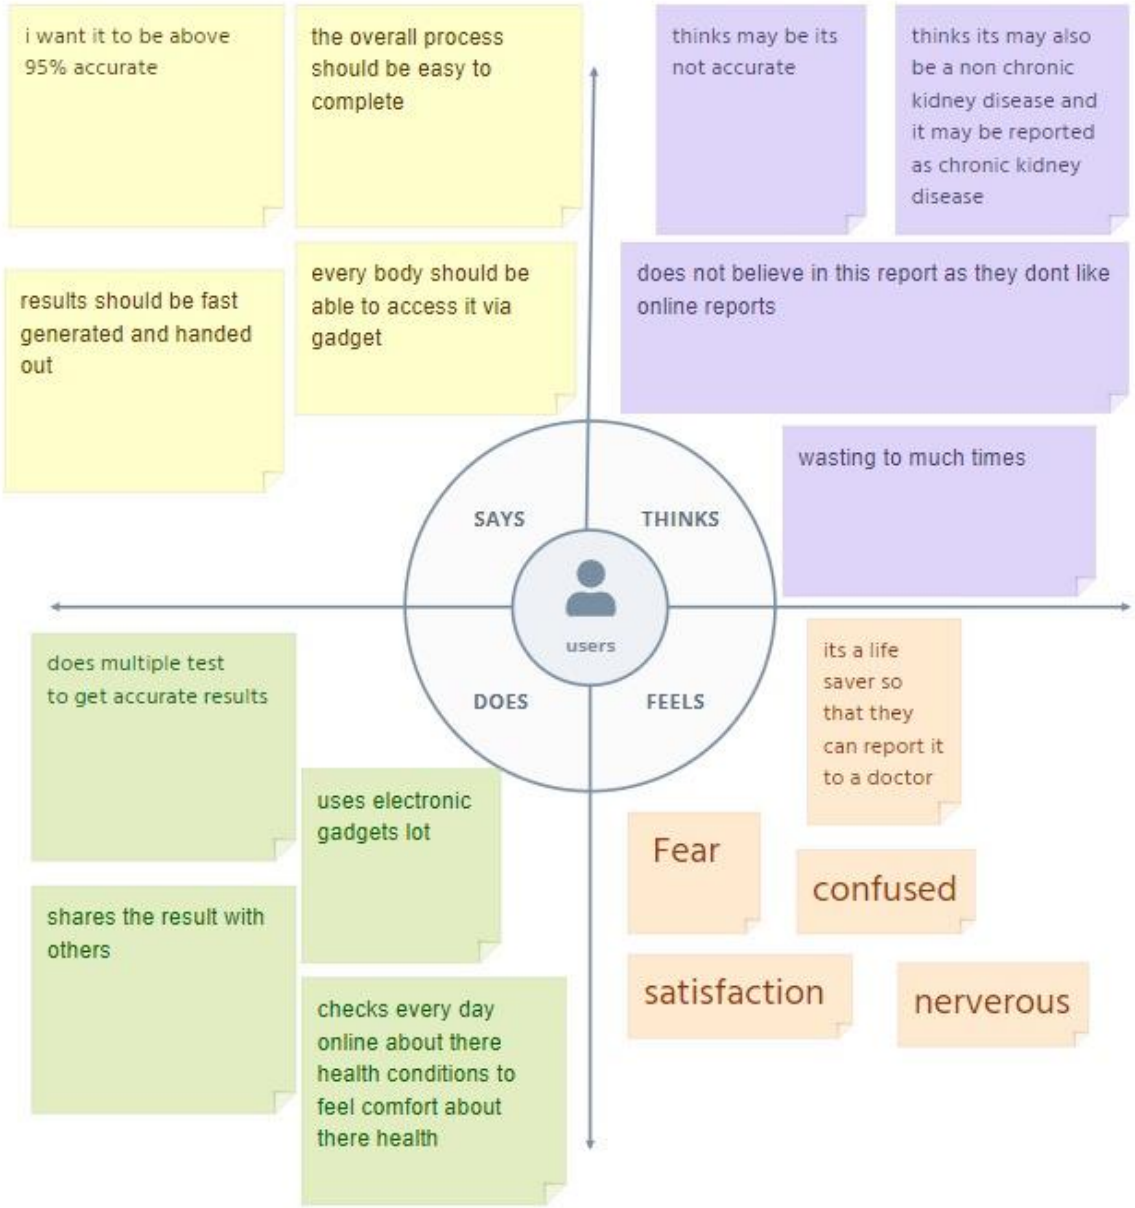
Empathy Map



i want it to be above 95% accurate
the overall process should be easy to complete
thinks may be its not accurate
thinks its may also be a non chronic kidney disease and it may be reported as chronic kidney disease
results should be fast generated and handed out
every body should be able to access it via gadget
does not believe in this report as they dont like online reports
wasting to much times
SAYS
THINKS
users
DOES
FEELS
does multiple test to get accurate results
its a life saver so that they can report it to a doctor
uses electronic gadgets lot
Fear
confused
shares the result with others
satisfaction
nerverous
checks every day online about there health conditions to feel comfort about there health
